

Customer Journey Map

Date	27 June 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1 Input & Problem Identification	Stage 2 Analysis & Recommendation	Stage 3 Decision & Farming Action
Actions <i>What does the customer do?</i>	• Opens the OptiCrop application. • Enters soil nutrient values (N, P, K). • Enters weather details (temperature, humidity, pH, rainfall).	• Submits the input data. • Waits for the ML model to analyze conditions. • Views the recommended crop.	• Selects the recommended crop. • Plans cultivation based on the recommendation. • Monitors farming outcomes.
Touchpoint <i>What part of the service do they interact with?</i>	• Home Page • Crop Prediction Form • Input Fields	• Flask Backend API • Machine Learning Model • Prediction Engine	• Recommendation Result Page • Crop Information Display • Farming Decision
Customer Thought <i>What is the customer thinking?</i>	• "I hope I enter the correct values." • "Which crop is best for my land?" • "Can this system help improve my yield?"	• "Is the prediction accurate?" • "How is the recommendation generated?" • "Can I trust the result?"	• "This crop seems suitable." • "Will this improve my productivity?" • "I can make better farming decisions now."
Customer Feeling <i>What is the customer feeling?</i>	Curious, Hopeful, Interested	Expectant, Confident, Reassured	Satisfied, Confident, Motivated

Process Ownership <i>Who is in the lead on this?</i>	Farmer / User	OptiCrop Machine Learning System	Farmer / User
Opportunities <i>How can we improve this stage?</i>	• Auto-fetch weather data. • Provide input guidance and validation. • Add multilingual support.	• Display confidence score. • Explain why a crop is recommended. • Reduce prediction response time.	• Provide fertilizer recommendations. • Offer irrigation and disease management advice. • Track crop performance and yield over time.
