

Brainstorming & Idea Prioritization

Date	27 June 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Dasari Srividya (Team Lead)	Develop an AI-based crop recommendation system using soil and weather parameters.	Machine Learning	1
2	Chokkani Ekshith	Build a web application that predicts the most suitable crop using environmental inputs.	Web Application + AI	1
3	Devarakonda Revathi	Analyze soil nutrient data to improve agricultural productivity and resource utilization.	Data Analytics	2
4	Anusha Idamakanti	Create a decision support system for farmers to reduce crop selection errors.	Smart Agriculture	1
5	Khaadar Vali Shaik	Use clustering techniques to identify similar agricultural conditions and crop patterns	Machine Learning	2
6	Team Discussion	Integrate machine learning predictions with an easy-to-use interface for sustainable farming recommendations.	Integrated Solution	3

Brainstorming & Idea Prioritization

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	AI-powered Crop Recommendation System using soil nutrients and climate parameters	High	High	1	Yes
2	Agricultural Data Analysis and Crop Pattern Identification using Machine Learning	High	Medium	2	No
3	Smart Farming Decision Support Web Platform integrating ML predictions.	Medium	High	3	No
